

Pastorbox Production Summer Project

Cybermissions volunteers will produce at least 35 Pastorboxes and ship them to the mission field.

Pastorbox is a portable digital library that enables learners to download free bible resources and courses straight to their laptops, tablets and mobile phones via a wireless signal transmitted by the Pastorbox.

The free training resources on the Pastorbox include a church-planting and evangelism course in 12 languages, ebooks, Christian bible courses and resources, and MP3 audio files all of which will be Creative Commons so that they can be widely and freely distributed to pastors and Christian leaders.

If a Pastorbox is used just once every two weeks to share resources with 200 people per occasion, that makes 5,200 people per year (per Pastorbox) who will receive training (who otherwise would not be able to do so). So, The 35 Pastorboxes combined would provide resources to 182,000 Christian leaders per year!

We need to raise \$7000 to cover purchasing all the electronic parts and volunteer tools, and to cover shipping and handling expenses. This works out to 70 people donating \$100 each. If you would like to be one of "the 70" then see donation information below:

Cybermissions

21615 Berendo Ave. Ste 400 Torrance, CA 90502
